DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of species 1 in the reply filed on 22 August 2007 is acknowledged. Claims 6-8, 13 and 14 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 12 depends from canceled claim 3, therefore the scope of the claim cannot be readily determined.

Claim Rejections - 35 USC § 102

4. Applicant's amendment has overcome the rejections under 35 USC 102.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1, 2, 4, 5, and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coburn et al, 3,794,314. '314 discloses the claimed invention, but not that the gasket has a width that is at least three times greater than its thickness. '314 does disclose that the gasket width is greater than the thickness. It would have been an obvious matter of design choice to have made the gasket of the desired size, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955). Further, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the gasket such that the width was at least three times greater than its thickness, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233. Here, '314 shows that the width is greater than the thickness. Also it is the examiner's position that the gasket deforms in compression over a width of the gasket, in that when the gasket bends, it is deformed,

and the surface along the width of the gasket must inherently stretch and deform. Note **36** an annular abutment member that forms a bearing surface **40**.

Response to Arguments

8. Applicant's arguments with respect to claims 1, 2, 4, 5, and 9-12 have been considered but are moot in view of the new ground(s) of rejection. Applicant argues that '314 does not deform over the width of the gasket. Please refer to the rejection above. Bending is a type of deformation under compression, therefore, '314 meets the claimed limitation.

9. As claims 3, and 11-12 could have been rejected under 35 USC 103 in the previous action, but were not, this action is made non-final to allow applicant fair opportunity to respond.
